COLLECTED:

Clinical Info:

RECEIVED:

REPORTED:

Test Name	Result	Flag	Reference Range	Lab
HCV RNA, QUANTITATIVE REAL TIME PCR				
HCV RNA, QUANTITATIVE REAL TIME PCR	<15 NOT DETECTED		<15 IU/mL	01
HCV RNA, QUANTITATIVE REAL TIME PCR	<1.18 NOT DETECTED		<1.18 Log IU/mL	01

Please note: There are several scenarios that may cause this combination of results. 1)Patient is not currently actively infected with HCV either because the patient has a resolved HCV infection or the patient has a false positive Ab test and was never infected with HCV. 2)A few patients with circulating anti-HCV antibodies that do not have detectable HCV RNA, may not have completely resolved the infection. These infrequently encountered patients could be carriers of the virus and should be managed according to the current Treatment Guidelines (J Hepatol, 1433-1444, Oct2011). Please correlate these findings with the patient's clinical history and any other diagnostic findings, including any evidence of liver dysfunction.

COMMENT

01

The analytical performance characteristics of this assay have been determined by Quest Diagnostics. The modifications have not been cleared or approved by the FDA. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes.

This test was performed using the COBAS(R)AmpliPrep/COBAS(R)TaqMan(R)HCV Test, v2.0.
