Test Name	Result	Flag	Reference Range	Lab
<b>PARVOVIRUS B19 ANTIBODIES (IGG, IGM)</b>				
PARVOVIRUS B19 ANTIBODY (IGG)	0.4			02
REFERENCE RANGE: <0.9				
INTERPRETIVE CRITERIA:				
<0.9 Negative				
0.9 - 1.1 Equivocal				
>1.1 Positive				
IgG persists for years and provides life-long immunity. To diagnose current infection, consider Parvovirus B19 DNA, PCR.				
PARVOVIRUS B19 ANTIBODY (IGM)	<0.1			02
REFERENCE RANGE: <0.9				
INTERPRETIVE CRITERIA:				
<0.9 Negative				
0.9 - 1.1 Equivocal				
>1.1 Positive				
Results from any one IgM assay should not be used as a sole determinant of a current or recent infection. Because IgM tests can yield false positive results and low levels of IgM antibody may persist for months post infection, reliance on a single test result could be misleading. If an acute infection is suspected, consider obtaining a new specimen and submit for both IgG and IgM testing in two or more weeks. To diagnose current infection, consider Parvovirus B19 DNA, PCR.
