POLIO 3 TITER:	<1:8			

The presence of neutralizing serum antibodies (titers of 1:8 up to >1:128) against polioviruses implies lifelong immunity. Some persons without detectable titers (<1:8) may also be immune as demonstrated by elicitation of a secondary-type serum antibody response upon rechallenge with live polio vaccine.

This test was developed and its analytical performance characteristics have been determined by Focus Diagnostics. It has not been cleared or approved by FDA. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes.
